Eliza is a mock Rogerian psychotherapist.

The original program was described by Joseph Weizenbaum in 1966.
This implementation by Norbert Landsteiner 2005.

ELIZA: Is something troubling you ?

YOU: Men are all alike.

ELIZA: What is the connection, do you suppose ?

YOU: They're always bugging us about something or other.

ELIZA: Can you think of a specific example ?

YOU: Well, my boyfriend made me come here.

ELIZA: Is it important to you that your boyfriend made you come here ?

YOU: He says I'm depressed much of the time.

ELIZA: I am sorry to hear that you are depressed.

YOU: It's true. I am unhappy.

ELIZA: Can you explain what made you unhappy ?

YOU:

Intelligenza Artificiale

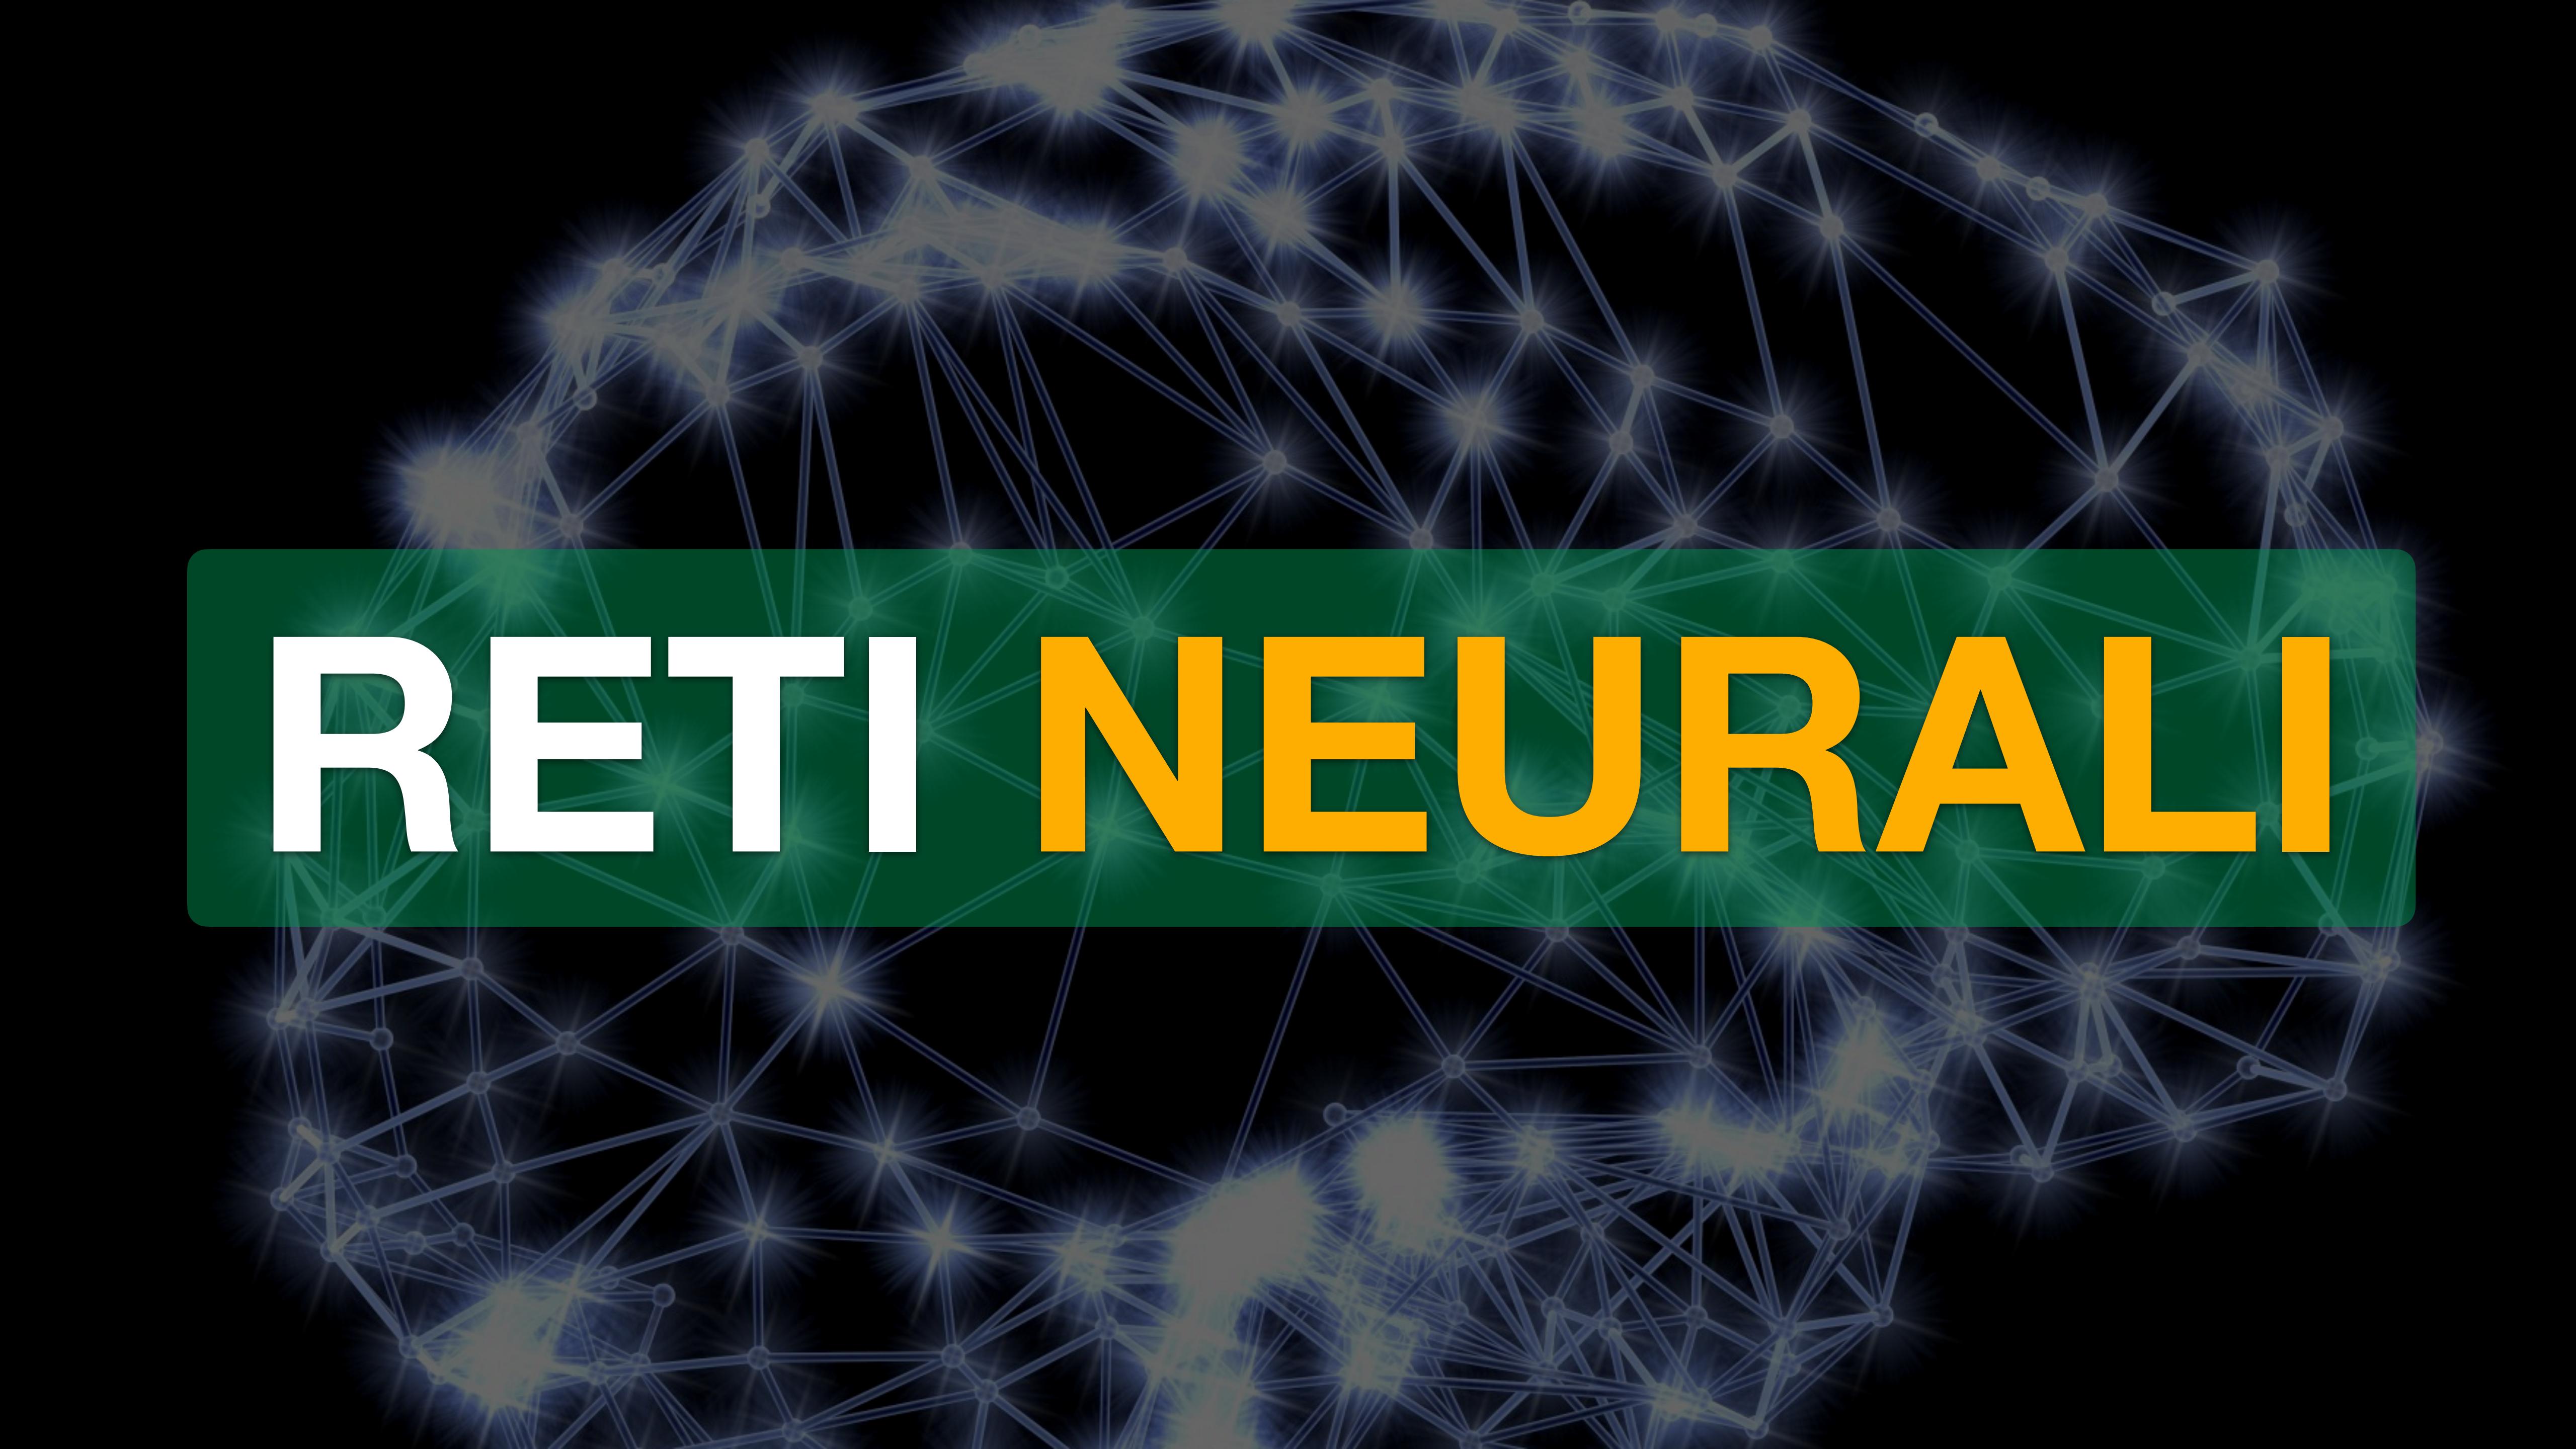

Intelligenza Artificiale

Machine Learning

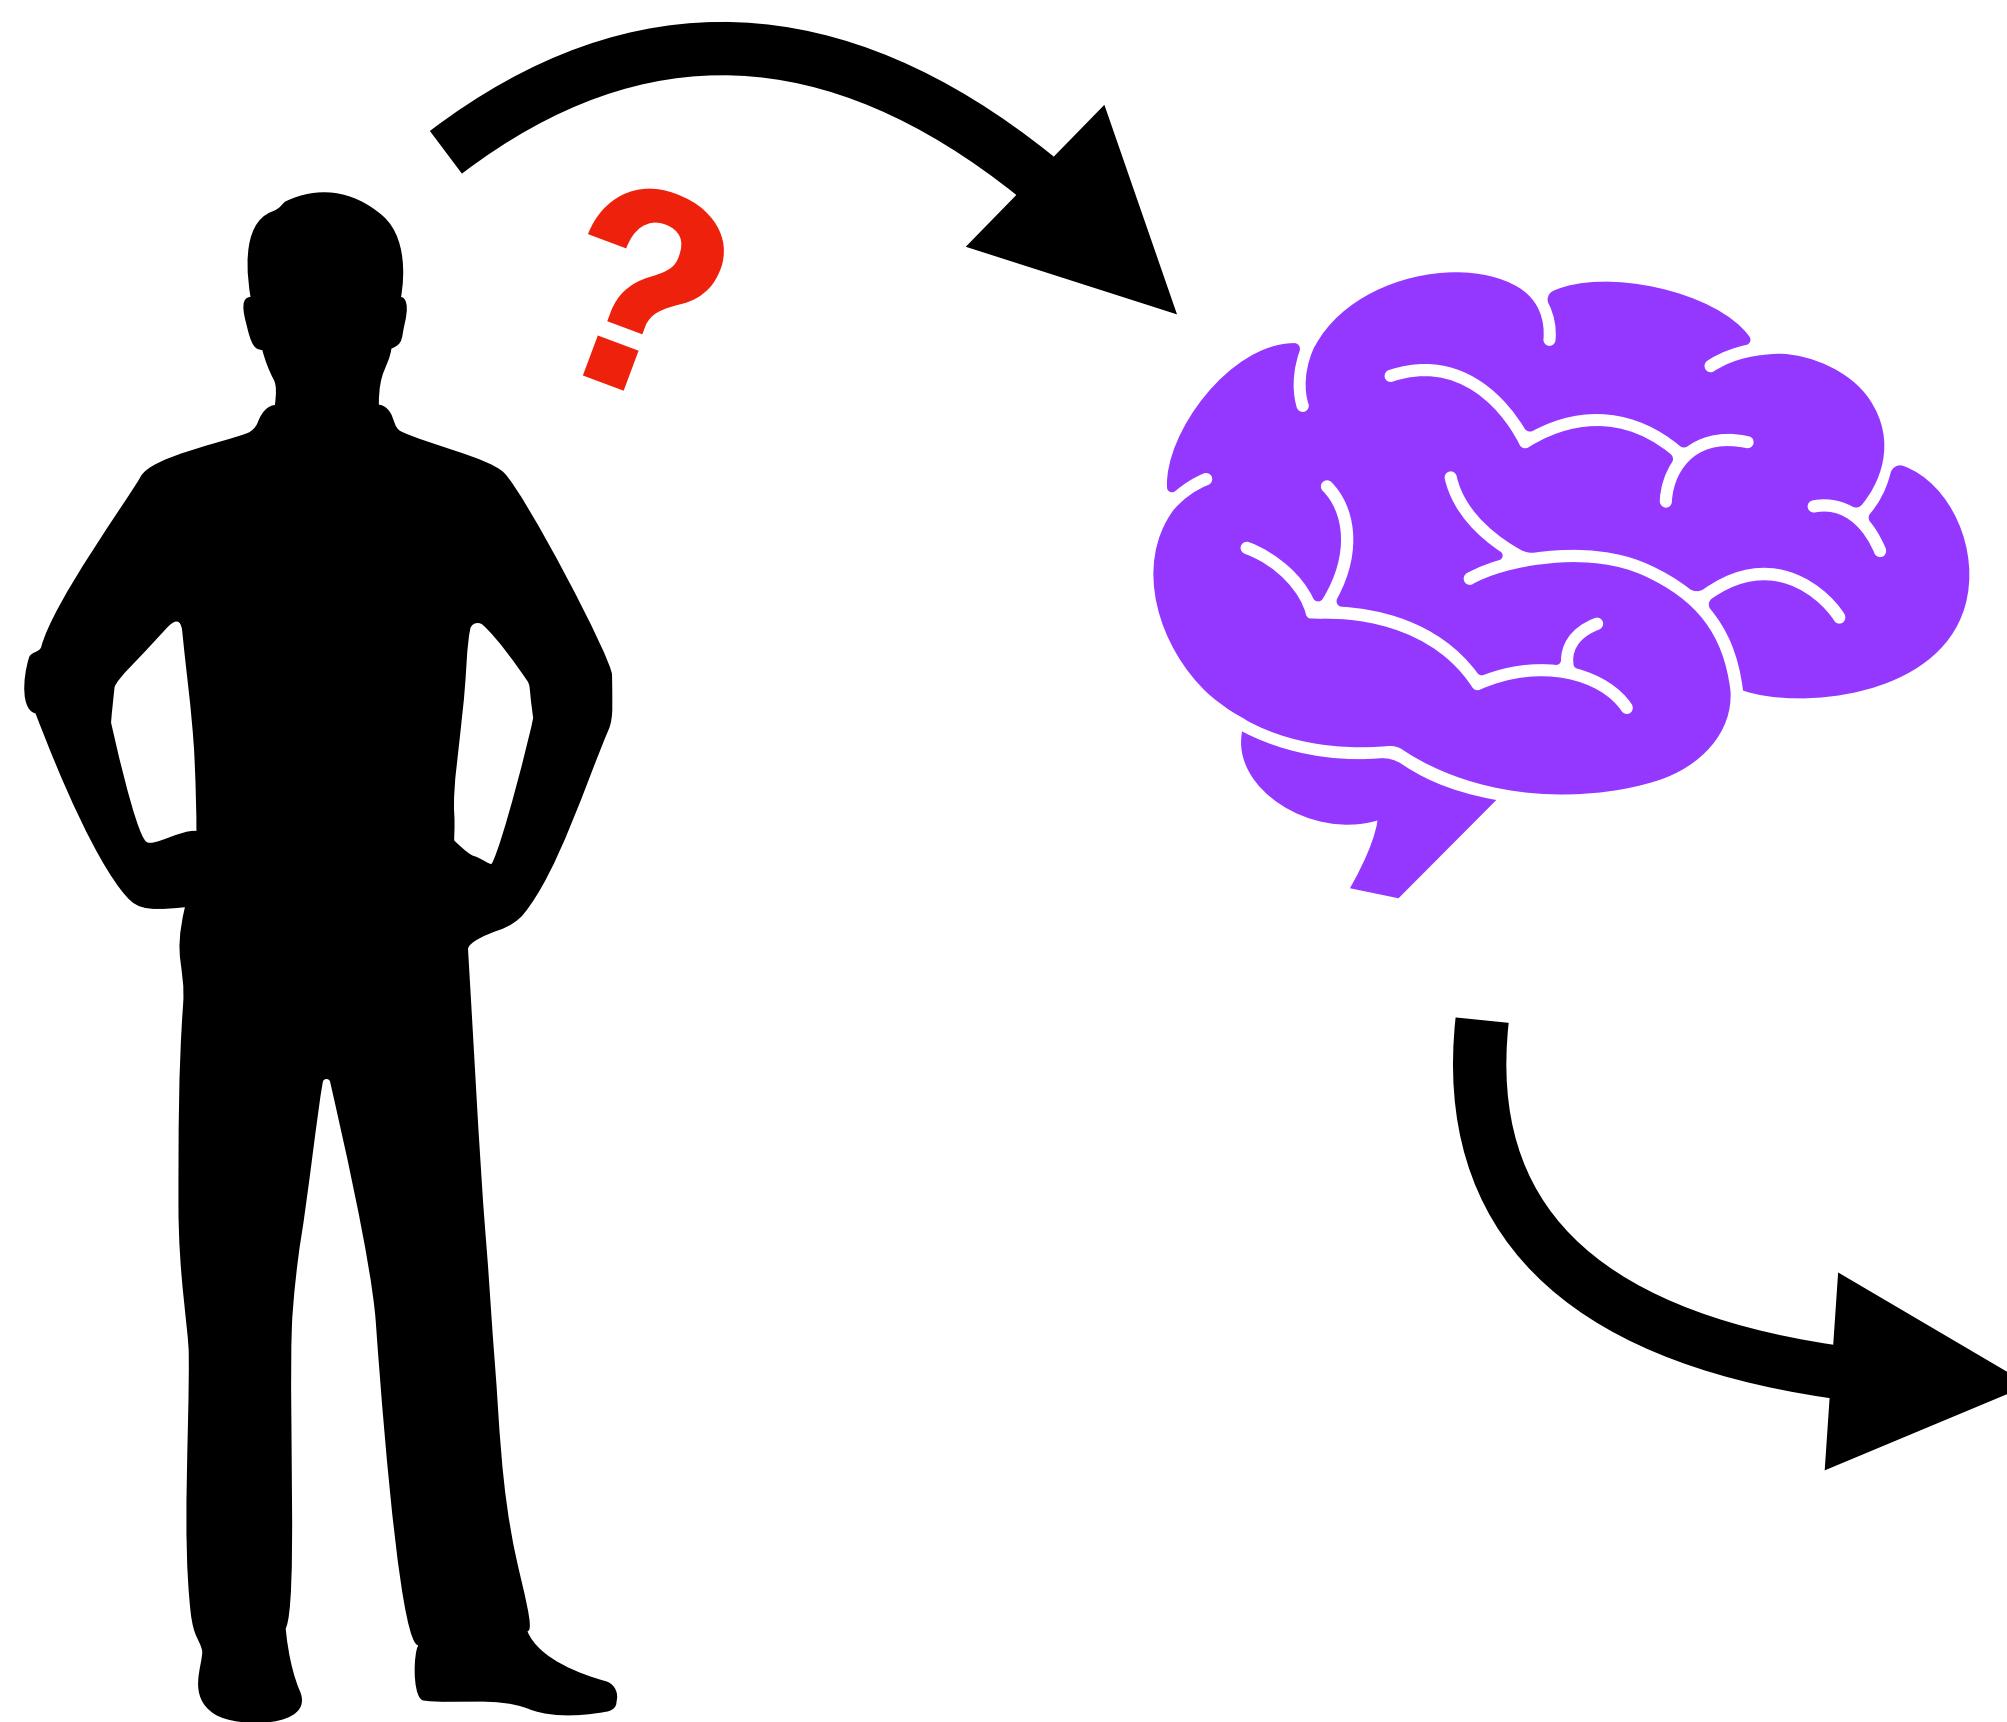

The background features a dense, glowing network graph composed of numerous small, glowing blue and yellow nodes connected by thin, translucent blue lines. The graph is set against a solid black background and has a slight transparency, allowing the text to be visible.

ChatGPT

Examples

"Explain quantum computing in simple terms"

"Got any creative ideas for a 10 year old's birthday?"

"How do I make an HTTP request

Capabilities

Remembers what user said earlier in the conversation

Allows user to provide follow-up corrections

Trained to decline inappropriate

Limitations

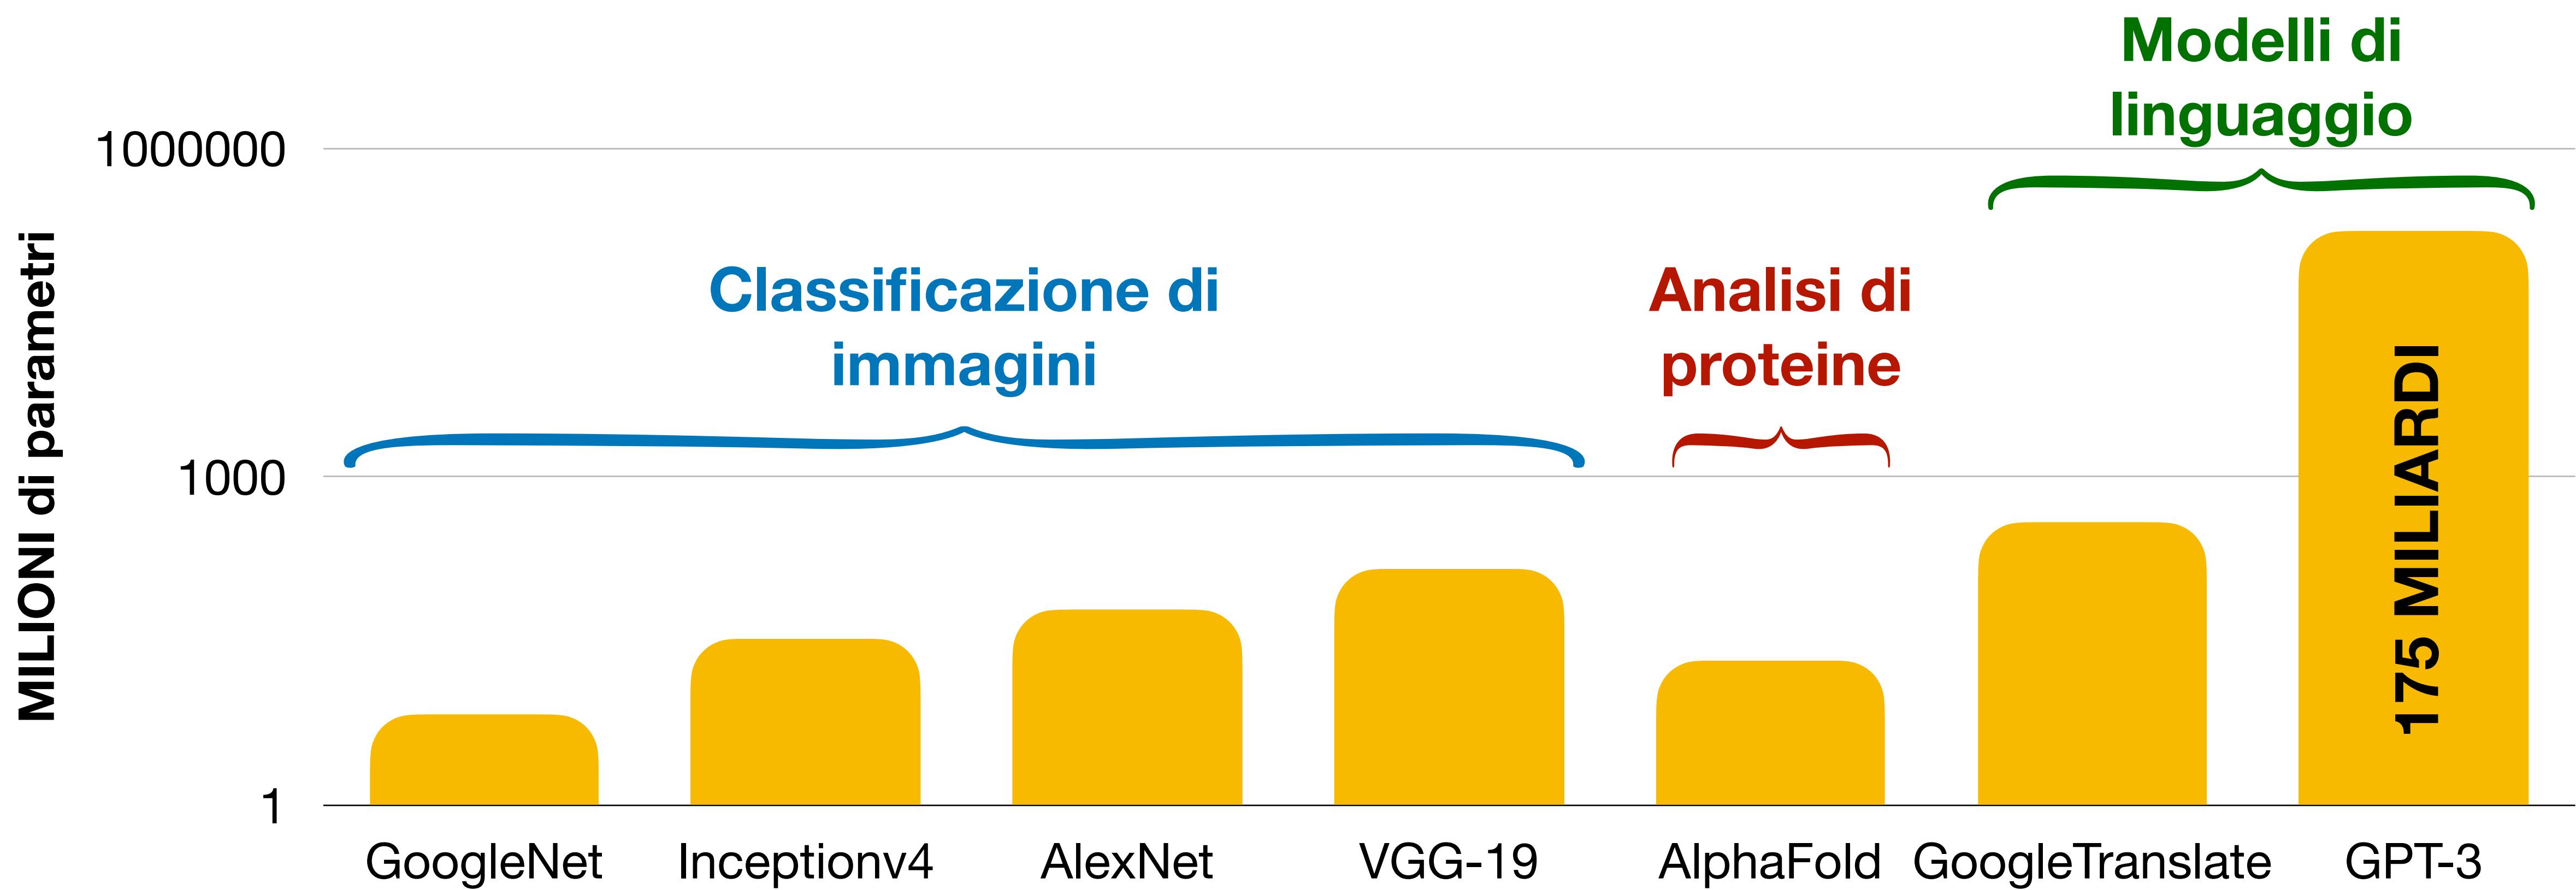

May occasionally generate incorrect information

May occasionally produce harmful instructions or biased content

Free Research Preview: ChatGPT is optimized for dialogue. Our goal is to make AI systems more natural to interact with, and your feedback will help us improve our systems and make them safer.

Più è difficile, più parametri servono

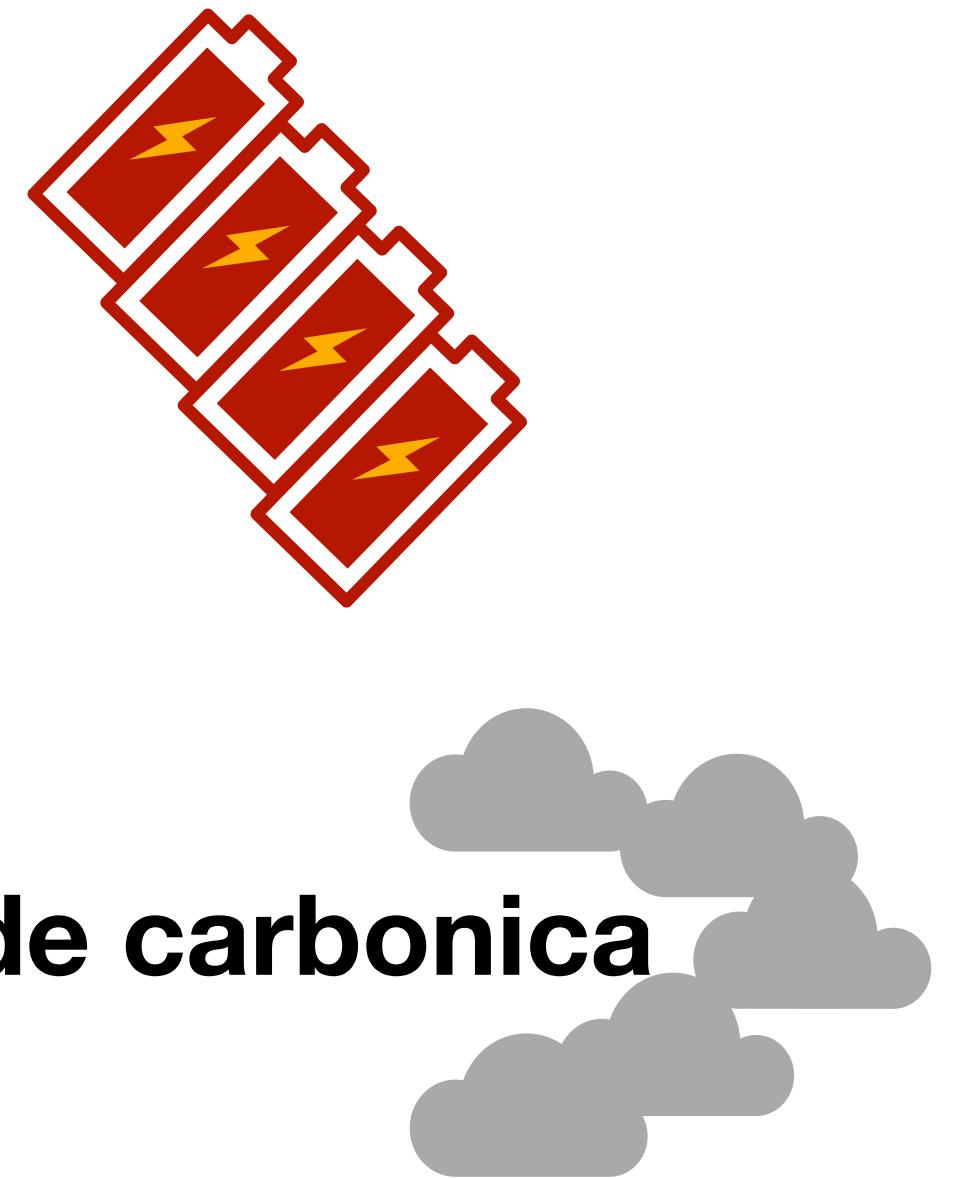

Quanta energia è necessaria?

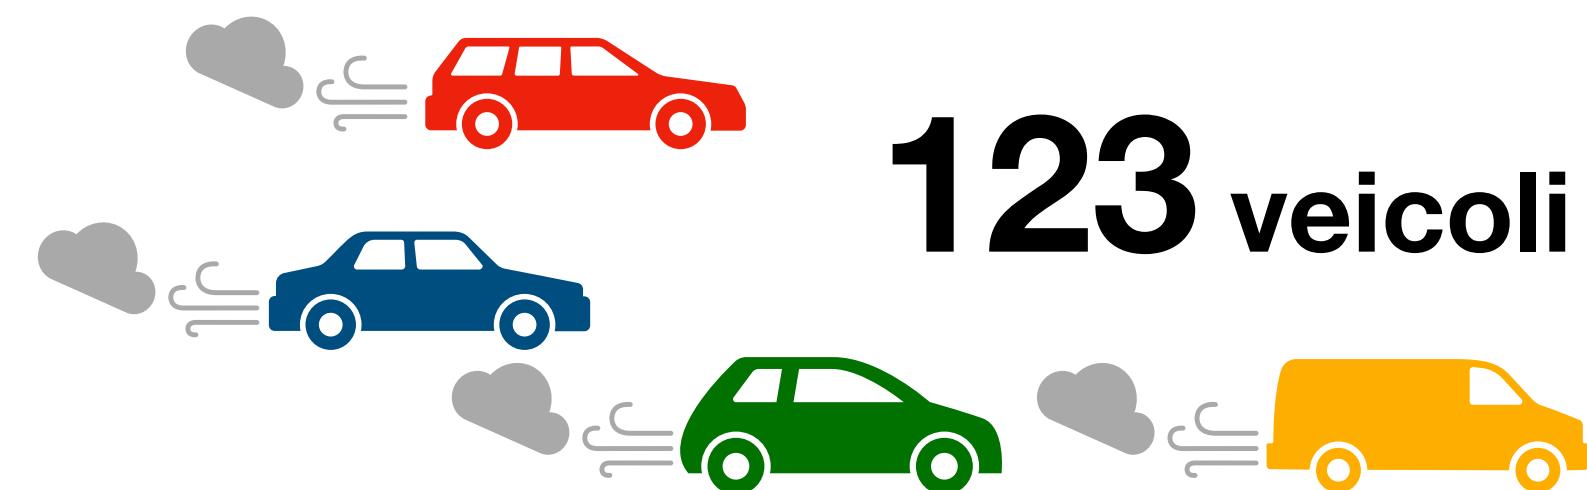

Consumo per la creazione di GPT-3

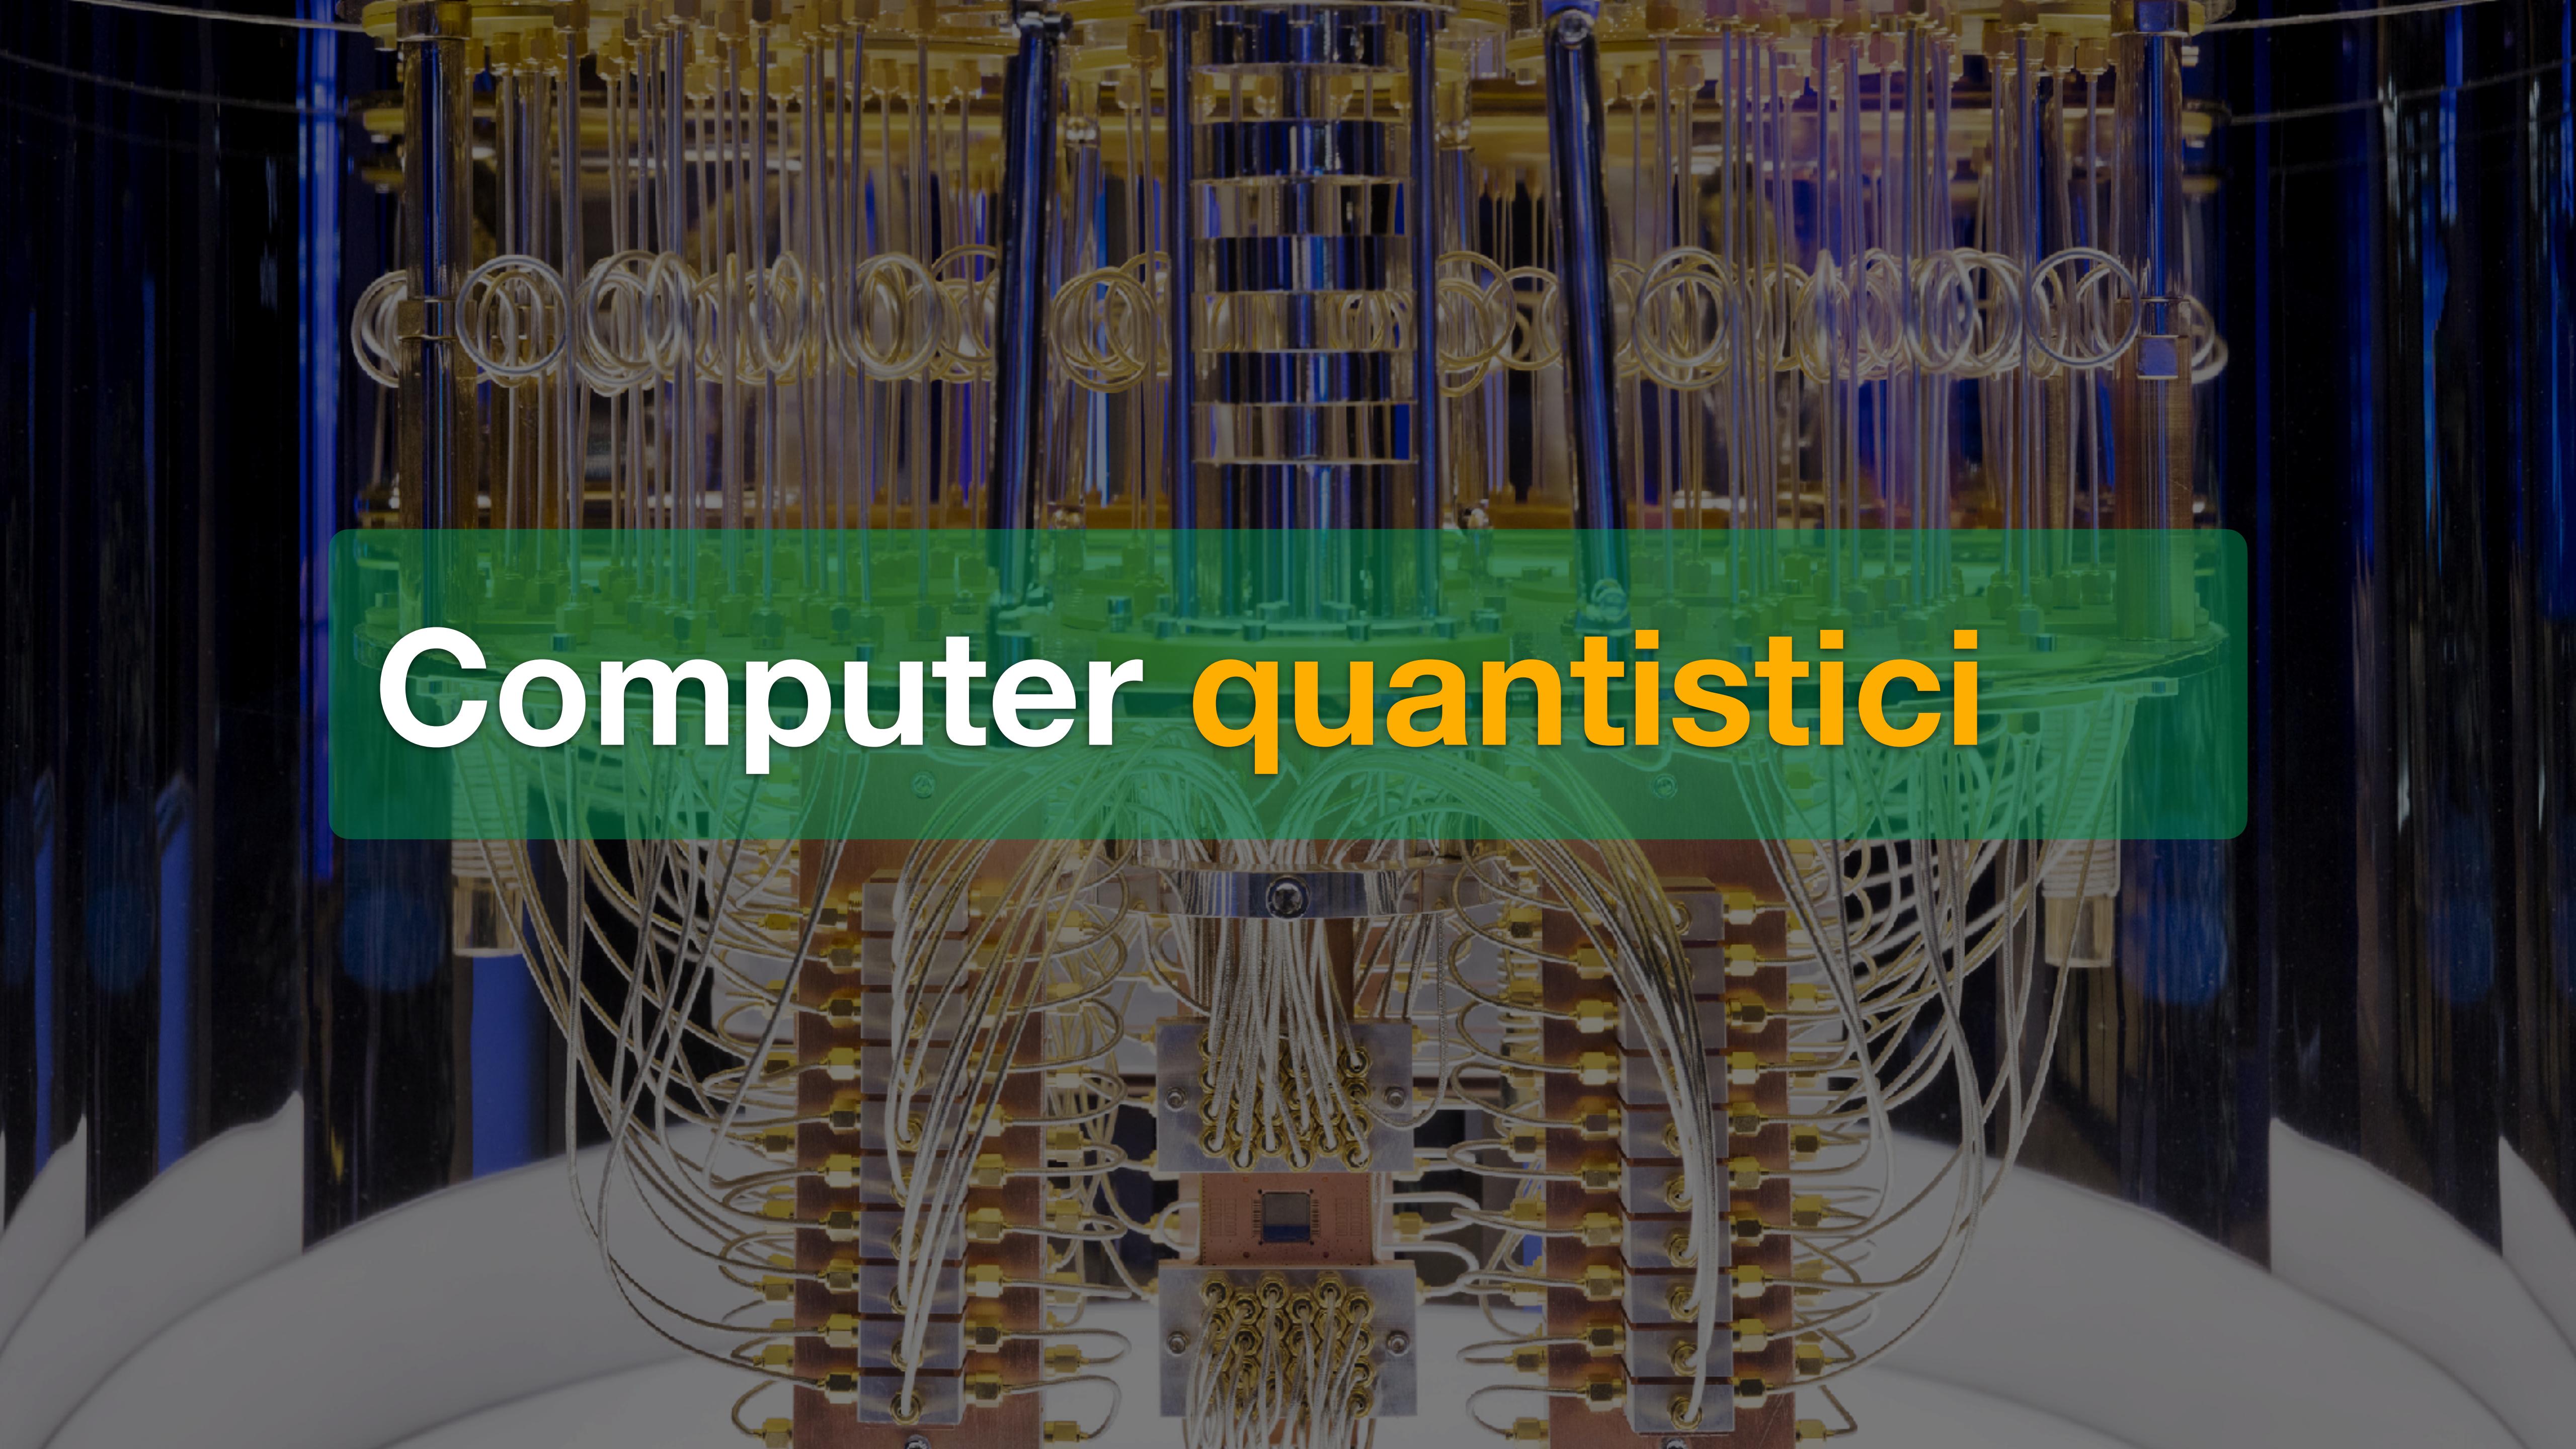

1.287 megawattora

552 tonnellate di anidride carbonica

123 veicoli a benzina guidati per un anno

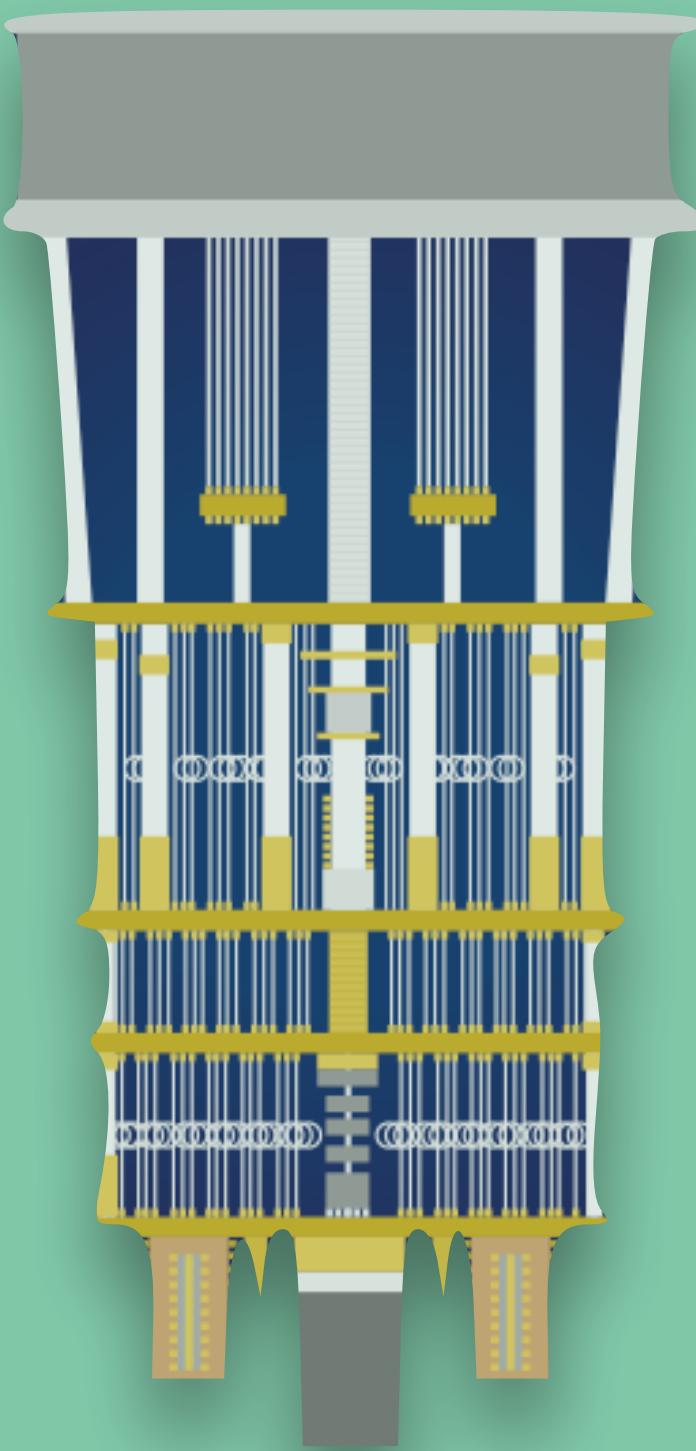

Computer quantistici

Richard Feynman

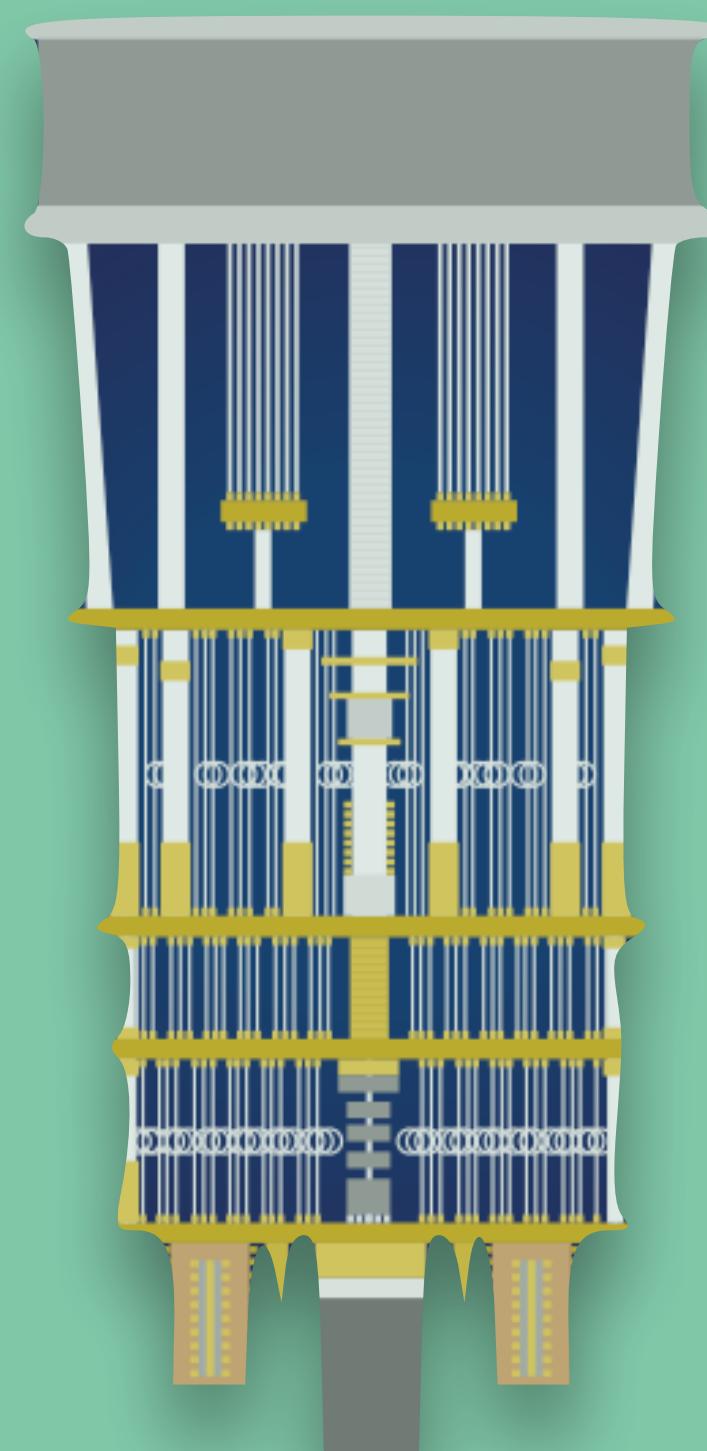

(1918-1988)

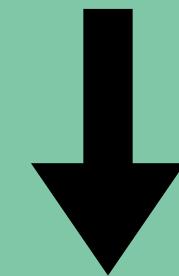

“La natura non è classica, dannazione,
e se volessi fare una **simulazione** della
Natura, sarebbe meglio la facessi
quantistica!”

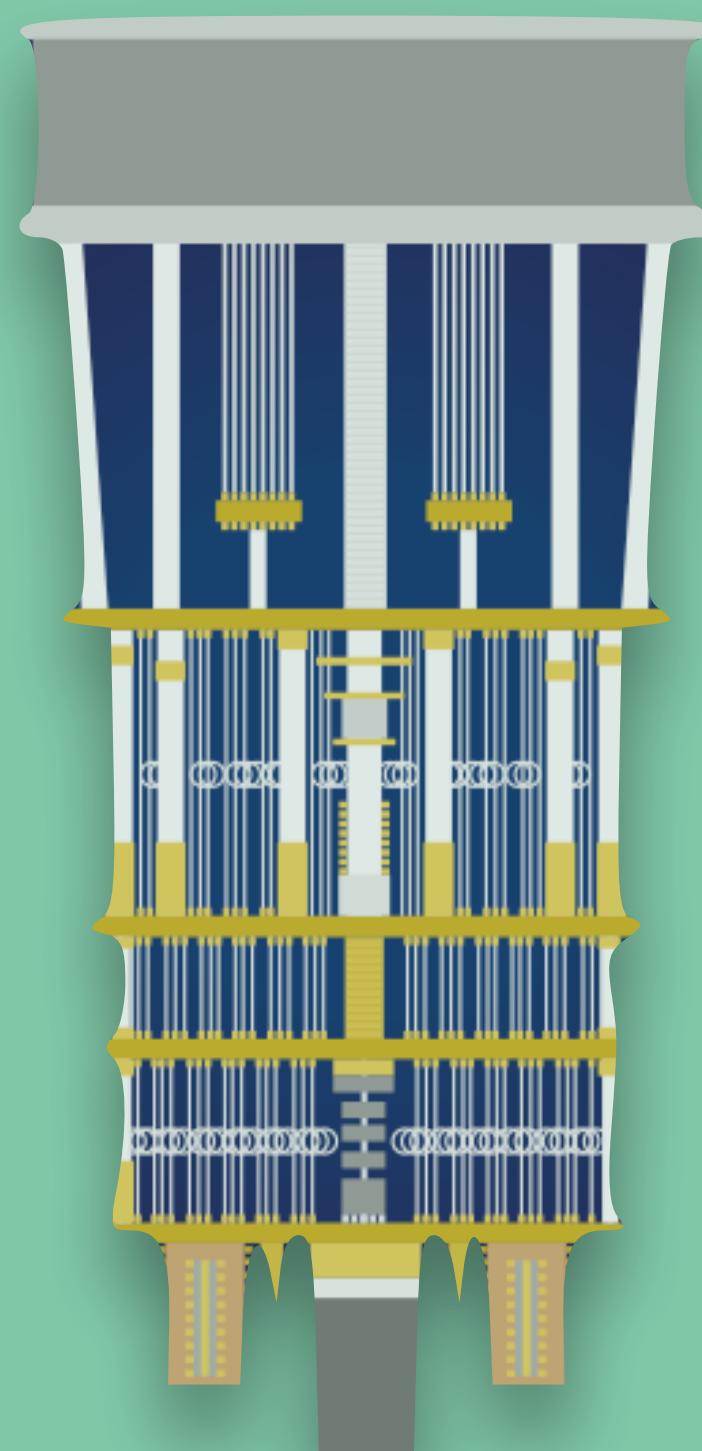

Computer quantistico

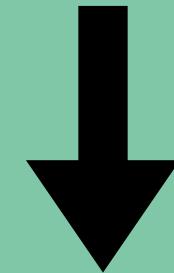

Computer quantistico
